Release:

PROCUREMENT SECTION July 22, 1971  
CURRENT SERIAL RECORDS 3:00 P.M. EDT

## GRAIN STOCKS DOWN FROM YEAR AGO

Stocks of major grains on July 1, 1971, were well below a year earlier, according to the Crop Reporting Board. Large declines were noted in sorghum grain, barley, soybeans, corn, and wheat. Rye, flaxseed, and oat holdings were above last July 1. Stocks of the four feed grains (corn, oats, barley, and sorghum) totaled 60.7 million tons--21 percent less than last July 1. Sharp declines in corn, barley, and sorghum were only partially offset by record-high oat stocks.

Stocks of all wheat were 17 percent smaller than a year earlier, with durum supplies off 31 percent. Soybean stocks were 30 percent below a year earlier but flaxseed stocks were up 22 percent.

Old crop carryover of all wheat on July 1, 1971, totaled 730 million bushels, 17 percent less than a year earlier and 11 percent below stocks July 1, 1969. Off-farm holdings of 490 million bushels were 15 percent less than a year earlier and farm holdings at 240 million were 22 percent below. Stocks in all positions on July 1 indicate disappearance during the July 1, 1970 to June 30, 1971 crop year of 1,533 million bushels compared with 1,394 million a year earlier and 1,297 million 2 years ago. Disappearance for April-June 1971 was 335 million bushels compared with 313 million a year earlier. The Commodity Credit Corporation owned 363 million bushels of the total wheat stocks and had loans outstanding on 204 million.

Old crop durum wheat stocks in all positions on July 1 totaled 53.6 million bushels, 31 percent less than a year earlier but 30 percent above 2 years ago. Farm holdings of 36.4 million were 39 percent below last year and off-farm stocks of 17.2 million bushels were down 2 percent. Disappearance during the crop year ended June 30, 1971, is indicated at 74.6 million bushels compared with 69.6 million a year earlier.

Old crop rye stocks in all positions on July 1 totaled 27.9 million bushels, 31 percent greater than a year ago and the largest for the date since 1944. Farm stocks at 2.4 million bushels were down 18 percent from July 1, 1970, but off-farm stocks of 25.5 million bushels were 39 percent greater than a year ago. Indicated disappearance during the 1971 April-June quarter was 6.8 million bushels compared with 3.4 million a year earlier and the heaviest usage for the quarter since 1963. The Commodity Credit Corporation owned 25.2 million bushels of old crop rye on July 1 with loans outstanding on another 1.3 million bushels.

Corn in all storage positions on July 1, 1971, totaled 1,564 million bushels, 19 percent less than a year earlier and 24 percent less than July 1, 1969. Off-farm stocks of 395 million bushels were 24 percent less than a year earlier and farm holdings at 1,169 million bushels were down 17 percent. Indicated disappearance from all positions during April-June was 967 million bushels, compared with 1,068 million during the same quarter a year earlier. The Commodity Credit Corporation owned 114 million bushels of corn stocks on July 1 and had loans outstanding on another 454 million bushels.

Old crop oat carryover stocks in all locations on July 1 totaled 512 million bushels, 4 percent above a year earlier and a record for this date. Off-farm holdings of 200 million bushels are a new high for July 1 (54 million above last July) and account for the record large oat stocks. Farm supplies of 312 million bushels are 33 million bushels less than last July 1.

Disappearance during the 1971 April-June quarter was 191 million bushels, 4 percent more than the 184 million during the same 1970 period. The Commodity Credit Corporation owned 152 million bushels of old crop oat stocks on July 1 and had loans outstanding on another 191 million.

Old crop barley holdings in all storage positions amounted to 156 million bushels on July 1, 1971, 34 percent less than a year earlier. Of total old crop barley stocks, the Commodity Credit Corporation owned 26 million bushels and had loans outstanding on another 60 million bushels. Off-farm storages totaled 75 million bushels, 26 percent less than a year earlier. Farm stocks at about 81 million bushels were 40 percent less than last July 1. North Dakota and Minnesota accounted for 67 percent of the U. S. farm stocks. Total disappearance during the 1971 April-June quarter, at 101 million bushels, was 6 million more than a year earlier.

Sorghum grain stored in all locations on July 1 totaled 178 million bushels, only half the amount on hand a year earlier, and the smallest since July 1, 1957. Both on-farm and off-farm stocks are down nearly 50 percent from July 1, 1970. Of the total supply, off-farm storages held 142 million bushels and farm storages 36 million.

July 1 stocks indicate an April-June disappearance of 181 million bushels, up 14 percent from the 159 million bushels used during the same quarter last year, and the largest since the 191 million of 1967. Drought in the Southwest continued to put a heavy demand on sorghum grain for feed.

The Commodity Credit Corporation owned 88 million bushels and had loans outstanding on another 20 million.

(Continued on page 16)

APPROVED:

*Clarence D. Balmby*

ACTING SECRETARY OF AGRICULTURE

CROP REPORTING BOARD:

B. M. Graham, Acting Chairman,

M. L. Koehn, Secretary,

B. W. Kelly, C. E. Burkhead,

(Continued from page 2)

Soybeans in all storages on July 1, 1971, totaled 283 million bushels, 30 percent less than a year earlier. At 92 million bushels, farm stocks were 16 percent larger but off-farm stocks of 191 million bushels were down 41 percent. The Commodity Credit Corporation owned 9 million bushels of the soybeans in storage and had loans outstanding on an additional 66 million bushels.

July 1 stocks indicate a disappearance during September-June of 1,083 million bushels from a beginning supply of 1,366 million bushels. Disappearance during the same period a year earlier was 1,047 million bushels. During the past 10 months, approximately 632 million bushels of soybeans were processed for oil, around 367 million bushels were exported and about 49 million bushels were used to seed the 1971 crop.

The April-June disappearance was 336 million bushels, 2 percent above the 331 million for the same period a year earlier.

Old crop flaxseed holdings in all storage positions on July 1, 1971, totaled nearly 27 million bushels, 22 percent above a year earlier and substantially above earlier years. Off-farm stocks of 23 million bushels account for 88 percent of total holdings. Off-farm stocks show a 35-percent increase over a year earlier but on-farm stocks are down 29 percent. Of total flaxseed stocks, the Commodity Credit Corporation owned 22 million bushels and had loans outstanding on another 3 million bushels.

July 1 stocks indicate a disappearance of 25.1 million bushels for the year ended June 30 from a supply of 51.8 million bushels (carryover of 21.8 million bushels plus 1970 production of 30.0 million bushels). Crushings are estimated at 18.8 million bushels and exports at 3.3 million for the period from July 1, 1970 to June 30, 1971. About 1.3 million bushels were used to seed the 1971 crop.
